SPECIALISATIONS

Resolution of construction disputes through negotiation, mediation and third party determination. Management of building and engineering projects. Construction planning and programming, design management, health & safety management and contract management. In-depth knowledge and experience of structural steelwork and building envelope systems. Design and construction experience on a wide range of civil engineering and building projects throughout the UK. High degree of commercial awareness.

HIGHLIGHTS

Acutus were appointed by an international design consultancy to prepare defences to allegations of professional negligence in relation to a UK national stadium. Paul's extensive experience of stadium construction from concept to delivery materially influenced the strategic direction of the defences. Working closely with the legal team he influenced the deliverables required of a range of key experts.

EDUCATION AND PROFESSIONAL STATUS

Bachelor of Engineering (with Honours) in Civil Engineering, University of Glasgow, 1990. Master of Laws in Construction Law, Glasgow Graduate School of Law, 2005. Member of the Institution of Civil Engineers. Member of the Chartered Institute of Buildings. Member of the Chartered Institute of Arbitrators.

BRIEF SUMMARY

A chartered civil engineer with twenty years experience in the construction industry, working in both main and sub-contracting. Experience has been gained in a variety of civil engineering and building projects, initially at site level, progressing to senior management, reporting directly to board level. Has an in-depth knowledge of a wide range of technical, practical, process and commercial aspects of construction projects. Has assisted and advised in the preparation and defence of commercial proceedings in adjudication, arbitration, mediation and litigation. Assisted in the reporting of investigations into construction procurement to an overseas Commission of Enquiry
